Map 2: Revised Boundary for the Resubmitted Village of Greenleaf

1.B. TERRITORY BEYOND THE CORE

The standard to be applied as found in §66.0207(1)(b), Wis.Stats, reads as follows:

The territory beyond the most densely populated one-half square mile specified in s. 66.0205 (1) or the most densely populated square mile specified in s. 66.0205 (2) shall have an average of more than 30 housing units per quarter section or an assessed value, as defined in s. 66.0217 (1) (a) for real estate tax purposes, more than 25% of which is attributable to existing or potential mercantile, manufacturing or public utility uses. The territory beyond the most densely populated square mile as specified in s. 66.0205 (3) or (4) shall have the potential for residential or other land use development on a substantial scale within the next three years. The Board may waive these requirements to the extent that water, terrain or geography prevents such development.

STATUTORY REQUIREMENTS

Pursuant to §66.0205 Wis. Stats. the Brown County Circuit Court has found that the Resubmitted Village of Greenleaf is an "isolated village as" defined by §66.0201(2)(c). The Resubmitted Village of Greenleaf is smaller and is still removed from the metropolitan community.

§66.0205(1) provides:

- (1) Isolated village. Area, one-half square mile; resident population, 150.

The revised boundary for the Village of Greenleaf meets this standard for an isolated Village. It is 0.50 square miles in size, with a resident population of approximately 735.

POPULATION ESTIMATES

Provide the Board with an accurate estimate of the population of the proposed village, and area population trends using Wisconsin Demographics Services Center or U. S. Bureau of Census data. The population estimate is critical because if the incorporation petition is approved, population will determine the initial allocation of state aids and shared revenues for the community.

As of the 2010 U.S. Census, the total population of the Town of Wrightstown was 2,221, living in 808 households, for an average household size of 2.75. The population for the Resubmitted Village of Greenleaf was calculated by counting the number of housing units in the revised village boundary and multiplying this by the average household size for the Town of Wrightstown, per the recommendation of the Department of Administration. There are currently 267 housing units in the revised boundary for the Resubmitted Village of Greenleaf. The average household size for the Town of Wrightstown is 2.75 (2010 Census).

Assuming there is an average of 2.75 people in each household, this indicates that the estimated population of the Resubmitted Village of Greenleaf is approximately 735 people. By comparison, the Greenleaf Census Designated Place (CDP), which has a different and smaller boundary the proposed village boundary for Greenleaf, has an estimated population of 733 (2013-2017 American Community Survey 5-Year Estimates) and 607 people as of the 2010 Census. Based on any estimate, the Resubmitted Village of Greenleaf meets the isolated village population standard.
